

# Socialism and Climate Change

## An Exeter Socialist Discussion Meeting

Thursday 3rd May 7-30 PM

Heavitree Room  
Exeter Community Centre  
St Davids Hill

Is global warming happening? Are CO<sub>2</sub> emissions to blame? Can capitalism cope with the problem? Can developing countries improve their productivity and living standards without making the situation worse. What should we do and what should governments do? What is a socialist response to the issue? Come along and discuss the issue!

The Exeter Socialists are holding monthly discussion meetings.  
We are an alliance of mostly independent socialists.  
All socialists are welcome to our meetings.
